Rumour control

- It is false news that the G7 exists merely as a front for systemd developers.
- There is also no GSOC OpenBSD project for systemd.
- I have no comment about FreeBSD / NetBSD.
- There is no cabal

Rumour control

- There has been no public statement from the G7 regarding their work on systemdBSD

Auction

The Pen

- This pen was sister to the pens first handed out by Michael W Lucas for free at BSDCan 4 years ago. Lucas offered this pen for the auction, and was purchased after a fierce battle for CA$80.
- Kirk McKusick also used the pen to sign the "Design and Implementation of BSD" book sold at the auction.
- This pen was brought back to BSDCan 2017, and was won by the same person for CA$40.
- In early 2017, it was the star of the best-seller "Git Commit Murder", which is clearly not about the BSDCan conference.
- Bid Early, Bid Often!
